Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA (<i>No database used</i>)
5	Environment configuration file (.env.example or similar)	No (<i>Not required</i>)
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA (<i>Web application</i>)
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://huggingface.co/spaces/mohith-imandi/SmartLender
Login Credentials (Demo)	Not Required
Platform / Hosting Provider	Hugging Face Spaces
Repository Link	https://github.com/mohithimandi/Smart-Lender.git
Demo Video Link	https://drive.google.com/file/d/1uBtJKkMjzqOw8ULGH_t30lmykgFvKlio/view?usp=sharing

Step 4: Run Instructions

Option 1: Run the Project Locally

1. Install **Python 3.8 or above**.
2. Open the project folder in **VS Code** or **PyCharm**.
3. Install the required dependencies:

```
pip install -r requirements.txt
```
4. Run the application:

```
python app.py
```
5. Open a web browser and navigate to:
<http://127.0.0.1:5000/>
6. Enter the applicant details and click **Predict** to view the loan eligibility prediction.

Option 2: Access the Live Application

If you do not want to run the project locally, you can access the deployed application using the link below:

Live URL:

<https://huggingface.co/spaces/mohith-imandi/SmartLender>

Open the link in a web browser, enter the applicant details, and click **Predict** to view the loan eligibility result.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Prediction accuracy depends on the quality of the dataset.	Improved through data preprocessing and model optimization.
2	Prediction history is not stored.	Can be added using database integration in future versions.
3	The application currently supports only loan eligibility prediction.	Future enhancements can include user authentication and loan recommendation features.
